

PERSONAL ACADEMIC WEBSITE / ENGLISH ONLY

A personal-first system with a complete text-only affiliation.

Faisal Albalwy remains the visible nameplate. The university relationship is clear, subordinate, and never presented as an official portal, endorsement, or joint identity.

Primary launch affiliation

Institutional affiliation: [Taibah University \(external\)](#). Same-tab external link. No university logo image is used.

- WCAG 2.2 AA
- Alexandria 400 / 600 / 700
- No image dependency
- No analytics

EVIDENCE LABELS

Use the system, not an institutional facade.

- **Direct:** eight immutable official base colors.
- **Derived:** WCAG semantic pairs, focus, forced colors, and print.
- **Proposed:** grid, spacing, components, Alexandria fallback, and text affiliation.
- **Unresolved:** institutional clearance is not claimed or needed for the text-only launch treatment.

No logo image, placeholder, symbol, favicon, pattern, icon sheet, photo, or template media appears on this board.

Eight official bases, used through accessible semantic pairs.

Teal Green
#0A8E6E

Royal Blue
#4056E3

Bright Sky Blue
#00AEDA

Pastel Pink
#FFD1DC

Lemon Yellow
#E5C603

Turquoise
#40E0D0

Deep Navy Blue
#111144

Very Light Gray
#F2F2F2

NORMAL TEXT PAIRS
Navy on white 17.6844:1. Navy on gray 15.7968:1. Royal on white 5.7403:1. White on royal 5.7403:1. Error on white 7.4779:1.

CONSTRAINT
Teal on white is 4.1118:1 and sky on white is 2.6033:1. They are accents, not normal text or required boundaries on light surfaces.

TYPE SPECIMEN

Research, teaching, and public-interest scholarship.

700 / display. Neutral specimen, not final biography copy.

Publication title: Privacy-preserving research methods for distributed academic data.

600 / heading. Long titles wrap without truncation.

Clear English academic prose remains readable in Alexandria, then system fallback if the candidate WOFF2 cannot load. DOI: 10.0000/example.2026.01

400 / body. 68ch maximum prose measure; 1.6 line height.

Font failure is safe. font-display: swap; only the approved relative WOFF2 is referenced. Tosh A is not loaded, named, or substituted.

0.25 / 0.5 / 0.75 / 1rem

1.5 / 2 / 3 / 4 / 6rem

12-column wide grid

75rem content max

Faisal first at every width. The affiliation is meaningful without an image.

ACADEMIC PROFILE

Research-led work with a clear public record.

No-image hero. No university mark, derivative contour, photo, or decorative pattern is needed to establish hierarchy.

View publications

Contact by email

Institutional affiliation: Taibah University (external)

Personal academic website. Not an official university portal or endorsement.

NARROW HEADER / 4-COLUMN REFLOW

Faisal Albalwy

Research

Publications

Teaching

Contact

Institutional affiliation: Taibah University (external)

Text and link remain; no mark is hidden or replaced.

Unavailable-logo and image-failure state

No image request is made, so there is no broken box, empty logo reserve, fallback graphic, or logo-dependent meaning.

Faisal Albalwy

Institutional affiliation: Taibah University (external)

Deep navy footer keeps the text treatment. No white or recolored logo is synthesized.

Inactive image tokens: the 2rem project clear-space and 12-15rem candidate image series are intentionally inactive at launch. They do not create an empty region or a minimum requirement for the affiliation text.

Publication and teaching content stays editorial, legible, and evidence-led.

PUBLICATION CARD / SELECTED STATE REMAINS TEXTUAL

Privacy-preserving methods for distributed scholarly data

Example citation structure for board testing. Title, authorship context, venue, date, and links remain plain English text.

Citation: Albalwy, F. (2026). Privacy-preserving methods for distributed scholarly data. Example Journal, 12(3), 1-12. DOI: 10.0000/example.2026.01

Read abstract

Open DOI

TEACHING LIST

- Course title with a long descriptive subtitle
- Seminar topic with a plain-language objective
- Office hours and institutional email pathway

FILTER AND CONTROLS

Search publications

Search title, year, or keyword

Search is a labelled control; no icon-only trigger.

Year

All years

BUTTONS, LINKS, NAVIGATION, AND INPUT STATES

Primary action

Secondary action

Disabled action

Default underlined link / hover and active move to navy with a thicker underline. Current navigation is structurally marked, not color-only.

Institutional email

name@university

Error: enter an address with a valid domain, for example name@university.edu. Error text and border appear together.

Focus: 3px royal outline plus 3px offset on light surfaces; sky focus on navy. Target size is 2.75rem.

Info

New filters are available.

Success

Message prepared for email.

Warning

Check the date range.

Error

Required evidence is missing.

Loading

Status text, no spinning-only cue.

Empty

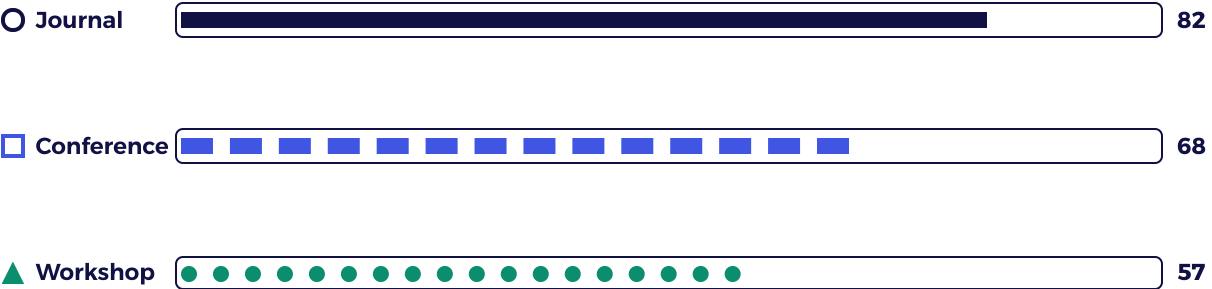

No records yet. Clear filters or browse all.

State rule: default, hover, focus-visible, active, selected/current, disabled, loading, success, warning, error, empty, and no-results all use text, structure, or programmatic semantics as well as color.

Charts are labelled twice: in the graphic and in a readable table.

Illustrative research activity - board specimen

Each series has a direct label, CSS shape marker, and solid, dashed, or dotted structural line. Values are not final site data.

Journal: circle and solid. Conference: square and dashed. Workshop: triangle and dotted. Direct labels and the table preserve the meaning when color is unavailable.

Accessible data alternative

Series	Marker	Value
Journal	Circle, solid	82
Conference	Square, dashed	68
Workshop	Triangle, dotted	57

Light fills, if used later, require a navy outline. Adjacent hue alone never distinguishes a series.

LONG TITLE REFLOW

A long publication title wraps across lines, keeps its link target, and never overlaps its citation or controls.

200% ZOOM

Columns reduce before text or controls shrink. Header navigation remains labelled and focusable.

400% ZOOM

One-column reflow, no hidden affiliation meaning, and no horizontal scrolling except an explicitly labelled data alternative.

The board remains coherent across assistive and constrained modes.

Keyboard focus	Reduced motion	Forced colors	Print
Visible 3px outline and offset; no hover-only actions.	120 / 180 / 240ms optional motion becomes 0ms with no lost information.	Canvas, CanvasText, LinkText, ButtonText, and Highlight replace color-only styling.	White background, black or navy text, underlined links, text affiliation, no template appearance.

FAILURE STATES THAT PRESERVE MEANING

Image unavailable No logo request, no placeholder, and the text affiliation remains complete.	Font unavailable System UI fallback preserves English content, hierarchy, link labels, controls, and citation text.
---	---

Do not use: a university logo image, recreated mark, symbol, favicon, white/dark/bilingual/vertical variant, protected pattern, supplied icon, photo, letterhead, certificate, Office/PDF template, or Tosh font. Do not add analytics, source paths, metadata, QR codes, or claims of endorsement.

BRD-009 AUDIT HANDOFF

Verify the board as a conservative launch model.

- Faisal nameplate is primary.
- Exact text affiliation and same-tab external link are present.
- Personal-site / non-endorsement meaning remains visible.
- All eight official values and contrast constraints are traceable.
- Alexandria is optional; system fallback is complete.
- Focus, status, form, empty, loading, chart, and table examples are semantic.
- Image-size and clear-space tokens are inactive, with no empty reserved region.
- Privacy, provenance, no-template, and no-media restrictions remain explicit.

Gate boundary

BRD-008 documents application evidence. It does not implement the site, deploy anything, establish university clearance, or close GO.
